

## **Christmas Block**

### **Vector Files & Instructions**

Thank you for downloading this rustic, yet elegant Christmas decoration that can be made on any CNC. All file types have been included.

Enjoy your creation and the reward of seeing it made real.

### **INSTRUCTIONS**

You have received files that contain the Christmas Block vector in Vcarve, DXF, PDF, SVG, AI & EPS formats.

#### **Vcarve File For CNC Routers**

This project uses a 1/16 down-bit to complete. You can get this tool [here](#).

The Vcarve file is currently set up to cut the project on a 10.5w x 5.5h piece of wood that is 3/8" or thicker. You can change the size as desired.

This file has toolpaths already set up. However, you will want to verify and recalculate according to your machine. All toolpaths are 'pocketing'.

You can adjust the project size accordingly to fit your machine. If you do, you will need to regenerate the toolpaths.

**YOU ARE RESPONSIBLE FOR VERIFYING EVERYTHING BEFORE RUNNING THE CURRENT SETUP.**

Enjoy your amazing creation!
